

JOB DESCRIPTION

Position

Job title: Chemical Technical Assistant
Department: CMC
Location: Berlin (Germany)

Company

PentixaPharm is a young radiopharmaceutical company with a small agile team of highly qualified employees committed to develop the innovative theranostic pair PentixaFor and PentixaTher specifically targeting the CXCR4-receptor expressed in most fast progressing diseases such as hematological and solid cancers as well as cardiovascular malignancies.

Purpose of the Position

- Support PentixaPharm radiopharmaceutical development in the radioactive lab covering all CMC aspects

Main Responsibilities and Tasks

- Set up and conduct of radiolabelling experiments, tests and analyses based on peptide chelator-conjugated chemistry
- Development of analytical methods (HPLC, TLC)
- Operating and maintaining of existing laboratory equipment.
- Improvement of processes and lab infrastructure to support an efficient lab organisation based on a radiation safety environment.
- Planning, running and document tests and experiments in a self-management way to develop and validate new and existing processes for routine production
- Analytical characterisation of APIs and formulations

Experience / Qualifications

- **Ideal:** Qualification/degree as Chemical Technical Assistant or Lab Technician, ideally including hands-on lab work in a production environment and excellent synthetic skills
- **Minimum:** Experience in handling hazardous substances incl. respective norms and documentation processes
- **Languages:** German and English

Required Competencies

- HPLC, TLC
- Good knowledge of Microsoft Office suit
- Synthetic skills
- Reliable, being proactive, and demonstrating alternative thinking to develop new ideas and solution orientated

Other Useful Information

- Specifics of the position: multi-disciplinary
- Internal and external contacts (organisation): yes
- Benefits:
 - Performance bonus
 - 30 days of vacation
- Exciting job opportunity with project responsibilities and freedom for professional growths and acquisition of new skills
